

Communication & Collaboration

Part of effective teaching is student support. Instructors may want to send a reminder to students or groups who haven't yet made a submission for an assessment. To make this easy, we have added a "Send Reminder" option to items in the Gradebook..

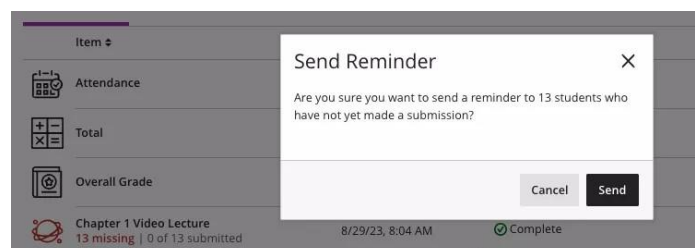

- From the Gradebook list view, this option is in the overflow menu.

- Instructors may access the "Send Reminder" option in the grid view by selecting the gradebook column header.

- Reminders are sent as a blind carbon copy to non-submitting students or groups as a course message.

- When sending the reminder, the instructor will need to confirm their intent to send the reminder. The confirmation displays a count of the number of non-submitting students or groups who will receive the reminder.
